

## Fitted and FlexFit Jackets

- To ensure the proper fit, we recommend ordering a sample.
- Take your body measurements and compare to chart below. The chart indicates the size most people would be comfortable wearing. The FlexFit are designed to be a snugger fit than Fitted jackets.
- Follow the "How to Measure" chart listed below. When measuring the chest, measure around the largest area. If in between sizes, order next size up.
- Our Fitted and FlexFit jacket lines are designed to be fitted through the chest and down through the hip bone area. For the hip bone measurement, find your hip bone and measure around this area (not shown under how to measure). When you have determined your chest size, refer to the hip bone and confirm that your hip bone measurement does not exceed the number shown. Should it exceed the number shown, please talk to your salesperson for options.
- Sleeve and body length can be altered by 1" increments for an additional \$10 charge for each alteration.
- Option available for a hip-fit. Hip-fit adds 3" to hip bone area.

### HOW TO MEASURE

#### 1 CHEST/BUST

With arms relaxed down at sides, measure fullest part of chest/bust while keeping tape measure parallel to the floor. Number of inches equals your chest/bust size.

#### 2 WAIST

Measure around your waist at the height you normally wear pants. Number of inches equals your waist size.

#### 3 HIPS - Women Only

Stand with both feet together and measure around fullest part of the hips while keeping the tape measure straight and parallel to the floor. Number of inches equals your hip size.

#### 4 INSEAM

Measure similar style pants that fit you well, from crotch seam to bottom of pants. Number of inches equals your inseam length (round to the nearest inch).

#### 5 SLEEVE LENGTH

Place hand on hip and bend arm 90°. Measure from base of neck along shoulder to elbow and down to your wrist. Number of inches equals your sleeve length.

#### 6 BACK LENGTH

Measuring your backside, start from the base of your neck down to the back of your waist. Number of inches equals your back length.
